

Research Analyst

Green Energy Economics Group, Inc. (GEEG) is a Vermont-based energy consultancy specializing in energy-efficiency and renewable resource portfolios investing in electricity and gas savings. GEEG provides technical and strategic assistance as well as expert testimony on gas and electric energy-efficiency, distributed resources, and beneficial electrification portfolio development, design, analysis, planning, and administration. The **research analyst** will assist our consulting staff with tasks related to the research and analysis of energy-efficiency, renewable energy, and electrification policy and programs. Candidates should have good writing skills and advanced proficiency in Microsoft Excel along with a demonstrated commitment to public interest issues such as sustainability, environmental justice, and consumer protection. Additional experience with data science related topics is preferred (regressions, database design, data visualization, etc.).

Job Responsibilities:

- Research and analyze the benefits, costs, and market conditions of energy-efficient and renewable energy technologies.
- Conduct analysis of policies and programs that promote sustainable energy
- Assist with the economic and potential analyses of sustainable energy resources
- Assist with client deliverables such as written reports, presentations, charts, and figures
- Create, use, and maintain spreadsheet-based tools and other analytical platforms to analyze energy technologies, programs, and portfolios.

Job Qualifications:

- Bachelor's degree minimum, with a Masters or Ph.D. in economics, energy conservation, mathematics, computer science, engineering, or related field(s) preferred
- 2+ years of experience in energy policy, energy efficiency program management, consulting, or a related field
- Strong analytical skills with the ability to process and synthesize information including strong spreadsheet, writing, and presentation skills.
- Experience with statistical tools and programming languages (e.g. Python, R, MATLAB. Etc.) strongly preferred.
- Ability to work independently and be proactive about initiating and completing tasks
- Committed to sustainable energy

What We Offer:

- Salary range is \$60,000 to \$80,000 depending on experience plus benefits
- Fully remote work.
- The ability to inform energy policy and planning decisions at the local, state, regional, national, and global levels.
- A collegial environment within a close-knit team of environmental analysts and consultants with
- Support for professional and career development.
